DETAILED ACTION

Allowable Subject Matter

1. Claims 1-34 are allowed over the prior art of record.
2. The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the prior art fails to disclose or make obvious a sensing apparatus for inspecting the structural integrity of visibly clear objects having an electromagnetic radiation source wherein a significant portion of an emitted spectrum therefrom occurs in the ranges wherein the objects are generally opaque and a support structure positioned to support the sensor device and source and to maintain the objects in between the source and the sensor device, and in combination with the other recited limitations of claim 1. Claims 2-17 are allowed by the virtue of dependency on the allowed claim 1.

Regarding claim 18, the prior art fails to disclose or make obvious a sensing method wherein visibly clear objects are inspected for structural integrity having the step of placing a visibly clear object under test disposed in between a sensor device and a source of electromagnetic radiation and sensing with the sensor device the electromagnetic radiation at the wavelengths which correspond to the opaque wavelength regions of the objects under test, and in combination with the other recited limitations of claim 18. Claims 19-34 are allowed by the virtue of dependency on the allowed claim 18.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
